```
Vector3.Lerp 插值
```

```
static function \textbf{Lerp} (\textbf{from} : Vector3, \textbf{to} : Vector3, \textbf{t} : float) : Vector3
```

Description 描述

Linearly interpolates between two vectors.

两个向量之间的线性插值。

Interpolates from towards to by amount t.

按照数字t在from到to之间插值。

t is clamped between [0...1]. When t=0 returns from. When t=1 returns to. When t=0.5 returns the average of from and to.

t是夹在 [0...1]之间,当t = 0时,返回from,当t = 1时,返回to。当t = 0.5 返回from和to的平均数。

```
JavaScript C# 0
```

```
// Animates the position to move from start to end within one second 
//在1秒时间动画位置移动从from开始到to结束。
var start: Transform;
var end: Transform;
function Update(){
    transform.position = Vector3.Lerp(start.position, end.position, Time.time);
}
```

另一个例子:

```
// Follows the target position like with a spring
//像弹簧一样跟随目标物体
var target: Transform;
var smooth = 5.0;
function Update() {
    transform.position = Vector3.Lerp(
    transform.position, target.position,
    Time.deltaTime * smooth);
}
```
